Notes

The above table has been prepared from data obtained from Business and Trade Statistics Limited (1979 to 1990) and from Mrs E Cummins (1990 to 1995).

Volumes have been converted to metric tonnes (1000 kgs = 1 metric tonne).

Price per tonne has been calculated on the basis of the total sales. It therefore represents an average of the sales prices in the year of export.

Value of exports includes only the cost of the product (ie, no transport costs).

Classification above (which is given by Customs & Excise) includes two products (meals and greaves).

"Other" row represents small and non-recurring exports.
